

## **FREE SDN Training for Conference Attendees!**

### **2014 Annual Conference: Creating Community**

April 23 – 24 at the Hilton Harrisburg

## **Software Defined Networking (SDN) Training and Demonstration**

Presented by Copper River Information Technology

**Thursday, April 24, 2014 from 1:30 – 4:30 p.m.**

Cost effective infrastructure for R&E communities require networks that can automate cloud network provisioning and commissioning while dynamically responding to changes in workload or traffic patterns. This enables more cost effective service offerings through network virtualization. This workshop will describe the results of a Software Defined Network (SDN) test bed at Marist College which combines data center switching and long distance optical networking between three simulated data centers under a common SDN network controller. We demonstrate rapid provisioning and dynamic wavelength assignment in response to changes within application requirements. This provides cost effective resource pooling within and between data centers. Training includes:

- Executive presentation on SDN technology and sample use cases.
- Marist College Presentation.
- SDN training session.
- Development of a SDN working group for PennREN.
- Q & A.

**Reserve your seat now in two simple steps! Seating is limited to 25 people.**

- 1.** Registration is mandatory and costs are included in the KINBER Annual Conference event registration fee. **Register now** at <http://www.eventzilla.net/web/event?eventid=2139004045>
- 2. RSVP to Patti Campbell** at [pcampbell@kinber.org](mailto:pcampbell@kinber.org) by April 14.

For more information about the Creating Community Conference visit <http://www.kinber.org/membermeeting2014/default.aspx>

### **About Copper River Information Technology**

Copper River IT was established in 2006 as a Federally Recognized Alaskan Tribal 8(a) Certified entity under the Authority of the Native Village of Eyak. Headquartered in Anchorage, Alaska, Copper River provides progressive, program-focused IT solutions based on expert engineering, agile execution and proven past performance. Copper River IT provides Network Engineering, Systems Engineering, Program Management, and Education Services that deliver a solid framework for uninterrupted operations.
