Local Service Coast to Coast

Tailored Solutions to Meet Your Unique Needs.

TierPoint supports your strategic business goals by delivering customized secure, scalable, high performance and highly available solutions, backed by unrivaled local support. From compliance to security, from storage to disaster recovery, we can help solve your business challenges by providing value-driven, enterprise-class solutions.

Cloud

TierPoint's VMware based Infrastructure-as-a-Service (IaaS) cloud offering is purpose-built for flexibility, redundancy and performance and priced to fit your budget. Benefits include:

- Enterprise Class Solution to Support Critical Apps
- Your Cloud, Your Way
- Agile, Scalable Infrastructure
- Continuous Innovation
- Security – Focused Architecture
- Improved Cost Efficiency

Colocation

Choosing the right home for your critical apps and data goes far beyond the four walls of a data center. It's about trust, security and the personal touch. All TierPoint data centers are:

- Carrier-class, carrier-neutral
- SSAE 16 audited including financially-backed SLAs
- 24x7 customer access with remote hands support
- Fast and reliable connectivity over a 10G national network

Managed Services

Simplify and strengthen your IT infrastructure with TierPoint's Managed Services. With solutions ranging from security and business continuity to managed networks, we can assess your current state and recommend managed services that make the most sense for your business needs and your budget. Our managed services include:

- Backup / Restore Services to keep your data safe and secure
- Business Continuity to keep your organization running when the unexpected occurs
- Managed Networks to streamline and simplify your IT operations
- Wireless Network planning and implementation for improved mobility
- TierPoint CleanIP for robust and easy-to-use managed security services
- Web Hosting
- Customized managed solutions to meet your specific needs

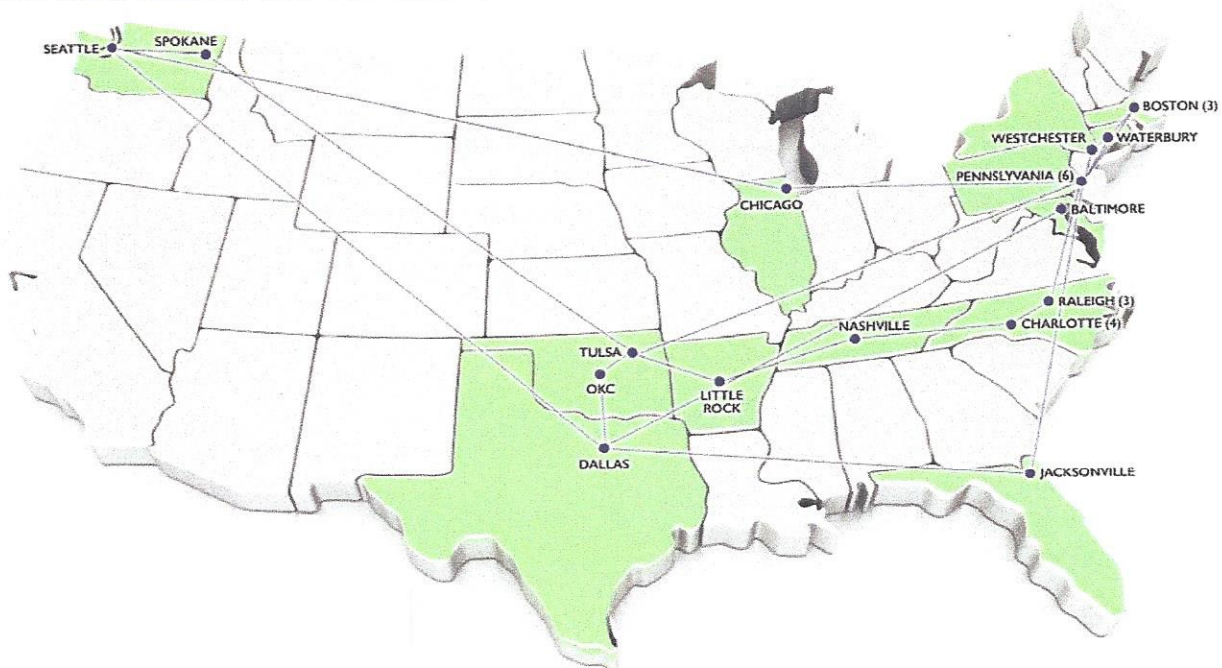

Disaster Recovery

Cover your organization's business continuity and disaster recovery needs with our customized DR solutions, tailored to meet your business requirements and budget. From cloud-based solutions with award-winning technologies such as Double-Take and Zerto, to dedicated workstations and complete private office suites*, we can help you protect critical data, meet mission critical IT infrastructure recovery needs, and maintain productivity around the clock.

*Available services may vary by location
