

KINBER E-Sports Direct Connect (KESDX)

KINBER now offers an E-Sports Direct Connection (KESDX) service providing direct connectivity to premier E-Sports gaming servers through its statewide PennREN network for both amateur and professional gaming needs. KINBER's KESDX Direct Connect service makes it easy to establish a dedicated network connection from any PennREN connected organization to our new Point of Presence in Ashburn, VA. Using KESDX service, you can establish dedicated connectivity between premier gaming networks and your organization's internal network for all level of E-Sports activities. KESDX reduces network costs, increases bandwidth throughput and network performance, and provides a more consistent network experience than commodity internet-based connections.

SERVICE OVERVIEW

Reduce Bandwidth Costs

- Improve network connectivity through direct data transfer in and out of the most popular game networks
- Reduces commodity network load and alleviates network congestion or bottlenecks
- Consistent network path

Reliable Network Performance

- KESDX connects to game networks over KINBER's PennREN backbone
- Improved Quality of Service (QoS) and performance
- Reduced latency

Flexible Options

- 1G or 10G based connection with dedicated direct connection options for serious gaming requirements
- Protected or unprotected circuit options
- MPLS based routing (VPLS available upon request)

**GAME NETWORKS AVAILABLE THROUGH KESDX INCLUDE:
Twitch, Riot, Blizzard, and Valve & additional networks to be added**
